July 18, 2011

Mr. Chris Wright,
Sr. Vice President,
Advanced Power Systems International, Inc.,
339 Main Street,
Torrington,
CT. 06790

Dear Chris:

As you know 1150 Park Avenue installed two Fitch catalyts about a year ago i.e. in time for a full winter's use from 2010 through 2011. The savings were more than we expected, some 8,830 gallons, of No 6 oil which, given the significant price increases for all heating oil during last winter, saved us approximately \$22,500. Therefore the Fiches paid for themselves in seven months. If we had been burning No2 oil this number would have been closer to \$26,000. The maintenance is simple and our own handymen have found it easy and quick to accomplish.

In fact, 1150 Park Avenue is now undergoing a major conversion with new burners on its two boilers etc to convert to No2 oil as a backup to an ultimate interruptible natural gas connection some time in the future. We will certainly be keeping the Fitches and expect that they will do good service for years to come.

Yours sincerely,

Daniel N. Storr,
Treasurer, Director 1150 Park Avenue Tenants Incorporated.
