

2010 GMC 5.3 liter Sierra Fitch Model: F4824B

The Fitch Fuel Catalyst has been a great asset for my truck. Before the Fitch was installed, I was averaging about 17 mpg between highway and city driving. In early June, I purchased a Fitch Fuel Catalyst for my truck and found it fairly easy to install. I took my first long distance trip to Fairbanks to test out the Fitch performance. I drove around that weekend and gassed up a couple days later and found I was averaging 21 mpg. My fuel economy increased a substantial amount using the Fitch Fuel Catalyst and that is a big improvement when gas is \$3.35 per gallon in Alaska. The truck has a 5.3 liter, dual exhaust, and drop in K&N filter. Thanks for a great product. Mike Russo
