

2008 Ford GT 500

Fitch Model F75624B

1. Remove the air filter for easier access to mount the Fitch unit
2. Mount Fitch unit to the shock tower – one hole already exists – you will need to drill another hole to support 2nd Fitch mounting bracket
3. Once Fitch unit is mounted and fuel lines are connected to Ford OEM quick connect fuel lines – re-install air filter

OEM Quick Connects – separate to adapt to the Fitch male & female quick connect fitting. Connect Fitch female fitting (red tab) to OEM fuel rail male and connect Fitch male to OEM female.

Fitch unit mounted
