

Ford Mustang Dominator – GT 6 & GT 8

GT 6 – Fitch model F4624B

GT 8 – Fitch model F5424B

Installation of the Fitch unit fit perfectly in the right rear corner of the engine bay where there were actually two pre drilled holes in the fender tabs to mount them. Not to mention, that this is a killer location being that the Dominator GT ID badges sit right behind the unit on the firewall.
